“SAFEPAD” is installed on a sand foundation of approximately 20 cm. In combination with the specially designed artificial grass “EURO PLAYGRASS 24” (available in 12 unique colours), the SAFEPLAY® system ensures perfect drainage, excellent stability and the required HIC-values. After installation, the artificial grass is filled with silica sand (approximately 25 kg/m<sup>2</sup>) for a durable and wear-resistant surface.

The SAFEPLAY® system is extremely suitable for:

- PUBLIC AREAS ■ SCHOOLS
- DAYCARE CENTRES ■ PLAYGROUNDS
- MUGA ■ SMALL PITCHES

*Think smart,  
think Europe Grass*
